## SUMMARY

---

Gameplay Programmer with professional game development experience at Grey Tower Studios and a strong foundation in Unity, C#, and gameplay systems development. Experienced in implementing AI behaviors, gameplay mechanics, multiplayer features, and entity-based systems while collaborating closely with designers, artists, QA, and producers. Passionate about creating engaging player experiences, solving technical challenges, and contributing throughout the entire game development process.

## EDUCATION

---

### Futuregames

Game Development, Leadership & Communication

### Maja Beskow Gymnasiet

Programming Specialization

## EXPERIENCE

---

### Gameplay Programmer

May 2025 - Dec 2025

*Grey Tower Studios*

- Developed gameplay systems and gameplay features using Unity and C#.
- Implemented and maintained entity behaviors and game logic in a collaborative production environment.
- Worked closely with designers and artists to translate gameplay concepts into polished in-game experiences.
- Participated in sprint planning, feature estimation, debugging, and production workflows.
- Utilized professional version control practices and collaborated within a multidisciplinary team.

### Gameplay Programmer & Product Owner

Apr 2024 - Jun 2024

*Futuregames - Game Project 3*

- Led communication and coordination between programmers, designers, artists, QA, and UX developers.
- Planned milestones, facilitated team meetings, and supported project delivery against deadlines.
- Developed gameplay functionality using Unreal Engine.
- Managed project workflows and source control using Perforce.

- Presented project progress, priorities, and technical solutions to stakeholders and team members.

## Gameplay Programmer & Programming Lead

Jan 2024 - Feb 2024

*Futuregames - Game Project 2*

- Developed an online leaderboard system featuring score sorting and web-based communication.
- Implemented split-screen cooperative gameplay functionality.
- Created procedural animation systems to improve gameplay responsiveness.
- Led the programming team and coordinated technical implementation throughout development.
- Assisted in code reviews and technical decision-making.

## Gameplay Programmer

Oct 2023 - Nov 2023

*Futuregames - Game Project 1*

- Implemented enemy AI using state machines and pathfinding systems.
- Developed user interface and menu functionality.
- Collaborated with designers to refine gameplay systems and player interactions.
- Participated in debugging, testing, and gameplay iteration.

## Junior Gameplay Programmer (Summer Internship)

Jul 2023

*Acino, Umeå*

- Gained professional game development experience in a studio environment.
- Contributed to player movement systems and gameplay implementation.
- Worked alongside experienced developers and participated in team development workflows.

## PROJECTS

---

**Customizable Life Management Platform** | Developed a modular full-stack application using Next.js, React, Supabase, GitHub, and Vercel. Features installable modules, cloud synchronization, configurable dashboards, and cross-module insights.

**Gameplay AI Experiments** | Developed gameplay AI systems in Unity using C#, focusing on decision-making, state machines, and gameplay behaviors.

**Minecraft Systems Development** | Created custom gameplay systems, datapacks, and resource packs focused on player experience and game mechanics.

## TECHNICAL SKILLS

---

C#

C++

Python

Unity

Unreal Engine

Gameplay Programming  
AI Systems  
State Machines  
Pathfinding  
Multiplayer Systems  
Entity-Based Architectures  
Git  
Perforce  
Fork  
Leadership  
Communication  
Agile Development  
Problem Solving  
Team Collaboration
